

Harmit Sonani

Full Stack Developer

Profile

I'm a full-stack developer. One of my favorite things to do is build websites. In a challenging and dynamic environment, I do my work to the best of my abilities, enhancing my professional expertise with learning and experience for career advancement.

Projects

Healthcare

A healthcare products website has all the features a possible e-commerce website needs, including the ability to add products to cart, accept payments with G-Pay and Razorpay, provide the login flow, and show products by category. It is a very straightforward website.

<https://healthcare-products.netlify.app/>

Rental

The website allows the customer to rent the product of his choice by inserting the product into the cart, paying online, and picking up the product at our location

<https://rental-prod.netlify.app/>

Gmail Clone

Gmail clone app is having all the necessary features like user can send the mail to another user, deleting the mail and adding the favorite mail as well as login system also

<https://gmail-clone-app.netlify.app/>

Beat With Music

beat with the song is an entertainment website users can listening favorite songs and take an enjoyment
